

TO BUSINESS AND HEALTH EDITORS:

Wiley X Eyewear Announces MotoSolutions as a Partner

RODEO, Calif., Feb. 27 /PRNewswire/ -- Wiley X Eyewear, a major supplier of eyewear to the U.S. Armed Forces, law enforcement agencies and the sports market, is partnering with MotoSolutions to provide Fogtech Advanced One-Step Anti-Fog to their customers who wear prescription lenses.

According to the New England Journal of Medicine (Dec. 9, 2004), Wiley X ballistic eyewear is one of the main factors responsible for the decreasing amount of eye injuries suffered by soldiers. Along with manufacturing high velocity eye armor for the military, Wiley X produces a line of specialty eyewear for the motorcycle, mountain/street bike, industrial safety, boating and fishing markets as well as a line of sophisticated sunglasses for both casual and active wear.

"We proudly recommend Fogtech(R) anti-fog to our customers who use prescription eyewear behind our products," said Myles Freeman Jr., co-owner and vice president of sales for Wiley X Eyewear. "Although all Wiley X Climate Control Series Eyewear is treated with our very own proprietary anti-fog coating, we recognize that many of our customers may experience fogging on their prescription lenses worn behind our products. Fogtech(R) anti-fog is the best product we have found to prevent that problem."

Gene Menzies, owner of MotoSolutions, a major anti-fog provider for the sports and industrial safety markets said, "We are proud of our new affiliation with Wiley X Eyewear, a company that has dedicated itself to researching and producing ballistic eyewear products that protect our troops. Fogtech(R) Advanced One-step Anti-fog will aid our armed forces by eliminating fogged lenses, a major cause of blurred vision."

Wiley X Eyewear, based in Livermore, CA, is privately owned by Myles Freeman Sr. and his two sons, Myles Jr. and Dan. The company began manufacturing shatterproof eyewear in 1986 and has supplied more than one million frames to the U.S. Armed Forces. Wiley X also supplies eyewear to the FBI, Drug Enforcement Administration (DEA) and Military Special Forces. Some models of Wiley X Eyewear have been tested to withstand a 12-gauge shotgun blast from 10 yards away. Additional information is available online at www.wiley-x.com.

MotoSolutions, based in Rodeo, CA, was established in 2003 with the mission of providing clear vision through protective optics. Their proprietary formula anti-fog, Fogtech(R), is standard safety issue on protective goggles, glasses and shields for many of the Fortune 500 Industrial companies. Additional information is available online at www.motosolutions.com.
